

# MARTIN AGGREY-MILLS

INFORMATION SECURITY MANAGER, CISA, CISM, CISSP

## Dear Hiring Manager,

I am excited to apply for a senior cybersecurity leadership position, including **CISO, Deputy CISO, Director of Information Security, or Head of Cybersecurity**. With over eight years of progressive experience I have developed strategic, technical, and leadership capabilities required to guide an organization's cybersecurity vision.

Currently, as **Information Security Manager at OC Payment GmbH (Rewe Group)**, I lead enterprise security, risk management, and governance programs. I advise executives, drive IAM and vendor risk initiatives, and ensure compliance with **NIS2, DORA, KRITIS, ISO 27001, NIST, GDPR, and PCI-DSS**. I also **built and lead Enterprise AI Security Management**, implementing secure frameworks to maximize AI adoption while mitigating associated cyber and compliance risks.

My career reflects consistent advancement from hands-on technical roles to enterprise leadership, implementing frameworks such as **NIS2, DORA, KRITIS, ISO 27001, ISO 47001, NIST, SOC 2, PCI-DSS, and GDPR**, while maturing programs in third-party risk, identity governance, incident response, and business continuity.

I bring a leadership approach that balances compliance, operational risk, and business performance ensuring security strengthens rather than obstructs organizational objectives. I collaborate effectively across technology, legal, procurement, and executive teams, while fostering a strong culture of security awareness and ownership.

I welcome the opportunity to contribute to your leadership team and help shape a future-ready cybersecurity program.

Sincerely,

Martin Aggrey-Mills, CISSP, CISM, CISA
